DRIVE & DOOR COMBO

ORCA - HEAVY WATERTIGHT SLIDING DOOR

The Orca is a traditional heavy-duty watertight sliding door designed for Solas-classified vessels requiring head pressures greater than 7 meters. With its unique features, it is tailored for applications where space is a critical factor. Thinner than competing products, it offers the same strength and integrity. The design allows for quick and easy seal replacement. The associated drive system is available in either electric or electro-hydraulic versions.

TECHNICAL DATA:

- Head pressures up to 12m
- Type approved by LR
- Door can be delivered in modular or non-modular execution
- Drive system mains: 220/230V AC 50- 60Hz for door leaves up to 1000kg
- Local battery back-up for emergency opening and closing at door
- Flush sill arrangement
- IPX7/X8
- C/O up to 1200mm (larger possible, but subject to class approval)
